Subject: Half Yearly Report for the period of (1st October, 2021 to 31st March, 2022) for "Refinery Expansion, De-bottlenecking of Reformer and LPG facility"

Dear Sir.

With reference to above, we are enclosing the Six Monthly Report for the period of 1st October, 2021 to 31st March, 2022 for your kind perusal.

The reports are being sent as per EIA Rules'2006 for the "Environmental Clearances" issued by MoEF&CC to Bongaigaon Refinery, (BGR) for "Refinery Expansion, De-bottlenecking of Reformer and LPG facility" Project.

Thanking you,

Yours faithfully,

(Biman Gogoi) CM (HSE) Ph: 9435122647

OFFICE MEMORANDUM

Subject:- Refinery expansion Debottlenecking the reformer and LPG facilities:-Bongaigaon Refineries and Petrochemics Ltd:- Environmental Clearance.

The undersigned is directed to refer to the above proposal and to state that the environmental aspects of the project have been examined and the project is cleared from anvironmental angle subject to the following stipulations:

The project authority must strictly adhere to the stipulation made by the State Pollution Control Board and the State Governmen and a comprehensive ETA will be submitted within 18 months.

ii. Any expansion of the plant, either with the existing product mix or new products can be taken up only with the prior approved of this Ministry.

The gaseous emissions from various process units should conform to the standard prescribed by the concerned authorities, from time to time. At no time the emission level should go beyong the stipulated standards. In the event of failure of any pollution control system adopted by the unit, the respective unit should be put out of operation immediately and should not be restarted until the control measures are rectified to achieve the desired efficiency.

iv. Adequate number (a minimum of 5) of air quality monitoring stations should be set up in the downwind direction as well as where maximum ground level concentration is anticipated. Also, stack emission should be monitored by setting up of automatic stack monitoring unit. The data on stack emission should be submitted to State Pollution Control Board once in three months and to this Ministry once in six months along with the statistical (analysis. The air quality monitoring station should be selected on the basis of modelling exercise to represent the short-term ground level concentration.

conted....2/-

A separate environmental management coll with suicely qualified people to carry out various functions she ld b. ... under the control of senior exective she will report direct. to the head of the organisation.

xv4 The funds ear-marked for the environmental protection accountes should not be diverted for other purposes and year-will erpenditure should be reported to this Ministry.

fi. The Ministry or any other competent authority may stipul any further condition after reviewing the comprehensive im in assossment report or any other reports prepared by prepart

The Ministry may revoke clearance if implementation of TII. conditions is not satisfactory.

The above condition will be enforced invorable along IVthe Water (Prevention and Control of Pollution) Act, 1974, Air (Prevention and Control of Pollution) Act, 1981 and Environment (Protection) Act,1986 along with the their emendments.

> (R.ANAIDAKUM:R) SCIENTIST 'SP

ANNEXURE – A

Sr. No	General Conditions	Compliance Status
1	The project authority must strictly adhere to the stipulations made by Assam State Pollution Control Board and State Government and the comprehensive EIA will be submitted within 18 months.	All stipulations by Pollution Control Board of Assam are strictly followed.
	Any expansion of the plant, either with the existing product mix or new products can be taken up only with the prior approval of this Ministry.	EC was granted by MoEF&CC to BGR for IndMax & BS-VI projects vide letter F. no.J11011/48/2016-IA-II (I), Dated 19 th Apr'2017. The project is implemented and
2		commissioned with enhance expansion of Crude processing from 2.35 to 2.7 MMTP, other associated projects, e.g. DHDT capacity from 1.2 to 1.8 MMTP, HGU from 25 KTPA to 30 KTPA, CRU-MSQ revamp and SDS(SRU) unit. All the units of the Projects are commissioned successfully except SDS (SRU) unit.
3	The gases emission from the various process units should conform to the standard prescribed by the concern authorities, from time to time. At no time the emission level should go beyond the stipulated standards.	 The process units are designed to meet the prescribed standards. Units would be put out of operation in the event of mal functioning of pollution control practice at BGR.
		3. Please Refer Appendix - A1.
4	Adequate number of (a minimum of 5) of Air quality monitoring stations should be set up in the down wind direction as well as where maximum ground level concentration is anticipated. Also, stack emission should be monitored by setting of automatic stack monitoring unit.	 Six Ambient Air Quality Monitoring Stations are operating around the complex at BGR including one continuous analyzer set up for compilation of Ambient Air Quality data. All these stations are selected based on modeling exercise representing short-term maximum ground level concentration.
		3. All major stacks in BGR are monitored with On-line continuous monitoring analyzers installed for SO2, NOx, PM & CO Analysis in all stacks as per CPCB guidelines and connected to CPCB & SPCB servers
5	There should be no change in the stack design without the approval of State Pollution Control Board. Alternative Pollution Control system and design (steam injection system in the stack) should be provided to take care of the excess emission due to failure in any system of the plant.	 No changes are made to the stack design. Steam injection facility is provided in burners of the furnaces.
6	The ambient Air Quality Data for winter season (November 1990 to January 1991) should be presented by June 1991.	These data were submitted as desired during 1991.
7	The project authority should recycle the waste to the maximum extent. Recycle plan should be submitted within one year. This should include use of recycled water for green belt development plan.	BGR has installed Tertiary Treatment Plant to facilitate reuse of treated effluent inside the complex as Cooling Water & Firewater Make up, unit housekeeping and watering in plantation areas (Horticulture) inside. No effluent is discharged outside the complex.

Sr. No	General Conditions	Compliance Status
8	Adequate number of effluent quality monitoring stations must be set in consultation with State Pollution Control Board and the effluents monitored and should be statistically analysed and the report sent to this Ministry once in six month and State Pollution Control Board every three months.	 Three joint sampling points for effluent are fixed in and around BGR by Pollution Control Board, Assam (PCBA) to monitor the discharge effluent quality. Joint sampling by Pollution Control Board, Assam is conducted once a month. The samples are tested at PCBA Laboratory. Beside samples are tested at BGR Laboratory as per
		consent condition and also on a daily basis to track effluent quality. 3. All samples conform to the prescribed Revised Effluent Standards 2008 (Pl. Refer Appendix - A2).
9	The project authority should prepare a well-designed scheme for solid waste disposal generated during various process operations or in the treatment plant. The plan for disposal should be submitted to the ministry within six months.	 All solid waste generated during various process operations or in the treatment plant are handled and disposed off as per laid down procedures in environmentally friendly manner. All hazardous wastes are handled and disposed off as per provisions of the Hazardous and other Waste (Management & Trans boundary Movement) Rules, 2016 and as per directions of statutory agencies. As a measure of Haz. Waste Management, a new third party is engaged for processing of the oily sludge & recovery of oil from the oily sludge stored in the sludge lagoon. During October'21 and March'22, 3280.82 MT of oily sludge has been processed by mechanised processing. Melting pit facility is also available for recovering oil from oily sludge. A confined bio-remediation plant of 100 m3 capacity was set up in collaboration with IOCL R&D in 2017 for treatment of oily sludge. During October'21 and March'22, 46.00 MT of oily sludge has been processed in the Bio- reactor. All statutory returns are sent to PCBA as per the
10	A detailed risk analysis of LPG storage facility should be carried out and a report be submitted to the ministry within six months.	provision of rule. Risk Analysis for LPG Storage was prepared and submitted to MOEF in 1992. Environment Clearance from MOEF & CC obtained for mounded bullet as per M.B. Lal committee Report.
	A detailed risk analysis based on	Few units of the project is commissioned. Detailed risk analysis was prepared and the report was
11	maximum credible accident analysis should be done once the process design and layout frozen. Based on this a disaster management plan has to be prepared and after approval of the nodal agency, should be submitted to this ministry within 6 months.	submitted to MoEF&CC. a) On site emergency plan exists and mock drills are conducted time to time to verify effectiveness of the plan as per OISD guidelines. b) Off site emergency plan approved by District authorities exists. Mock drills are conducted time to time to verify effectiveness of the plan in coordination with district authorities.

Sr. No	General Conditions	Compliance Status
12	Detailed green belt development plan should be submitted within a year.	Green belt development plan was a part of the comprehensive EIA and the same is already submitted to MOEF. The plan was implemented and continued.
13	A report on occupational health of the workers with the incidents of diseases in the past five years as per record available with the BRPL and their correlation with type of occupational health problem the environment may cause may be submitted within six months.	The report is already submitted as desired. Latest data is attached in Appendix A -13.
14	The project must setup a laboratory facility for collection and analysis sampling under the supervision of competent technical personal that will directly report to chief executive.	A well-equipped Laboratory exists in the complex. Environment Laboratory of BGR is accredited by NABL. Appendix-A12
15	A separate environmental management cell with full-fledged laboratory facilities to carry out various management and monitoring functions should be set up under the control of Senior Executive.	BGR is having a separate environmental management cell of HSE department and full-fledged laboratory to carry-out environment management and monitoring functions. Organogram of HSE Department is attached as Appendix - A11.
16	The funds earmarked for the environmental protection measures should not be diverted for any other purpose and year-wise expenditure should be reported to this Ministry and SPCB.	The funds earmarked for the environmental projects are used for this purpose only and not diverted or spent for other purposes. Environmental protection related expenditure for financial year 2020-21 was Rs. 455.74 Lacks and in FY 2021-22 is 427.76 Lacks and CER expenditure against IndMax & BS-VI for the year 2021-22: Rs 272.56 lakhs and total 738.56 Lacks till date against the project
17	The Ministry or any competent authority may stipulate any further condition(s) on receiving reports from the project authorities.	
18	The Ministry may revoke or suspend the clearance if implementation of any of the above conditions is not satisfactory.	
19	The above conditions will be enforced, inter-alia under the provisions of the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, the Environment (Protection) Act, 1986 and the Public Liability Insurance Act, 1991 along with their amendments and rules.

APPENDIX - A3

Tree Plantation (1st October, 2021 to 31st March, 2022)

The entire area inside BGR covered with greenery through massive plantation activities. Through massive plantation work and by giving protection to natural forest growth in side BGR premises, the entire area has become green. The entire plant area where processing plant facilities do not exist has a green cover. This helps in reduction of noise and air pollution level in one hand while on the other hand provides protection to ecological features of the area. The refinery has an excellent quality environment around its complex. Natural greenery can be seen all around the complex as well as in BGR Township and in all seasons of the year.

Tree Census was done by Divisional Forest Office, Chirang. As per census, 84545 numbers of plants which include trees including shrubs, ocular estimated 33000 numbers bamboos in 1150 no. bamboo culms and also trees planted by BGR during 2003 to 2012

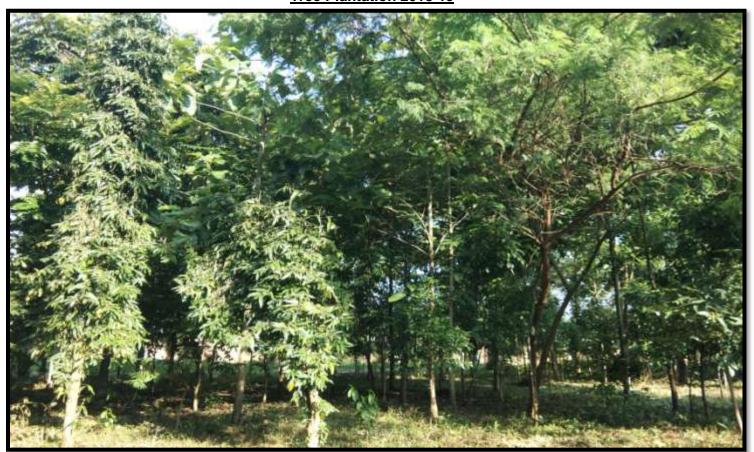

BGR has planted 29600 nos of saplings in the FY 2017-18, in FY 2018-19, 30,062 nos, in FY 2019-20 14340 nos, and in FY 2020-21 25606 nos. of saplings planted in and around the complex

During the FY 2021-22 BGR has planted 1,00,000 nos. of tree saplings

Tree Plantation 2017-18

Birhangaon State Dispensary Plantation, 10,000 nos. Sapling Planted by Miyawaki Method in the month of August, 2017. Grouth as on May, 2022

Tree Plantation 2018-19

BGR TOWNSHIP PLANTATION, Planted Van mahotsav 2018, Growth as on April'2022

<u>Birhangaon State Dispensary Plantation, 5375 nos. Sapling Planted by Miyawaki Method in the month of September, 2019 Grouth as on March, 2022.</u>

Tree Plantation 2020-21

On WED'2020, 3740 nos. of sapling planted in BGR Township, Grouth as on April,2022.

Tree Plantation 2020-21

4810 nos of sapling Planted in the month of August'2020 at Hatipota Brahma Mandir, Grouth as on April,2022.

Tree Plantation 2021-22(One Lacks sapling planted during FY 2021-22)

Planted on WED'2021, in BGR Township, Grouth as on April,2022

Tree Plantation 2021-22 (One Lacks sapling planted during FY 2021-22)

Part of Plantation at Amguri Forest Range, Koila Moila, In collaboration with DFO Chirang

APPENDIX - A 4

<u>Additional Information</u>

(1st October, 2021 to 31st March, 2022)

Effluent reused during the period is **100**% of the total effluent treated which includes plant effluent as well as BGR Township sewer.

Under the Leak Detection and Repair programme (LDAR), BGR is conducting quarterly Fugitive Emission Survey. During the period from 1st October, 2021 to 31st March, 2022, all potential leaky points checked and few Leaky points detected and rectified. By following LDAR programme in true spirit, the company could not only avoid potential loss of 0.726 MT/D (approx.) of light Hydrocarbon to the atmosphere through fugitive sources but also able to keep healthy work environment in the plants.

To ensure work area quality and health of equipments, quarterly noise survey was conducted covering all the operating plants, control rooms and ambient surrounding the BGR. During 1st October, 2021 to 31st March, 2022, Noise Survey for two quarters of 2021-22(Q3 & Q4)has been completed and no abnormality was reported.

As a measure of Hazardous Waste Management, A third party has been engaged for processing tank bottom sludge through mechanized treatment. Another third party is engaged for processing of the oily sludge & recovery of oil from the oily sludge stored in the concrete lagoon. Melting pit facility is available for recovering oil from oily sludge.

One old slurry thickener in ETP,from Petrochemical section was converted to confined space bioremediation reactor to treat oily sludge with help from IOCL-R&D. The process of bio-remediation started from July 2017. From 1st October, 2021 to 31st March, 2022, 46 MT of oily sludge has been processed in the Bio-reactor.

Bio-remediation facility of BGR

Further two more Rain Water Harvesting (Ground Water Recharging) schemes in BS-VI project have been implemented during 2019-20 and Two more implemented in the FY 2020-21 in Admn. Building and BGR Township temple complex..

NABL certificate of QC Lab of Bongaigaon Refinery

National Accreditation Board for Testing and Calibration Laboratories

NAB

CERTIFICATE OF ACCREDITATION

INDIAN OIL CORPORATION LIMITED, QC LABORATORY, BONGAIGAON REFINERY

has been assessed and accredited in accordance with the standard

ISO/IEC 17025:2017

"General Requirements for the Competence of Testing & Calibration Laboratories"

for its facilities at

P.O. DHALIGAON, BONGAIGAON, CHIRANG, ASSAM, INDIA

in the field of

TESTING

Certificate Number:

TC-6027

Issue Date:

29/04/2022

Valid Until:

28/04/2024

This certificate remains valid for the Scope of Accreditation as specified in the annexure subject to continued satisfactory compliance to the above standard & the relevant requirements of NABL.

(To see the scope of accreditation of this laboratory, you may also visit NABL website www.nabl-india.org)
